

# PURATISE AIR-CON CLEANER

---

Suitable for all types of vehicles, including cars, vans, trucks, caravans, motorhomes and boats also for homes and offices.

Available in 250 ml cans.

Fungal spores released into the vehicle can cause musty smells and flu like symptoms including wheezing, coughing, eye and throat soreness, drowsiness and chest tightening.

**HOW PURATISE WORKS:** Puratise contains an intense anti-bacterial cleaning agent, proven to combat harmful bacteria and fungi.

Puratise incorporates an advanced odour neutraliser, leaving the vehicle with a clean fresh fragrance. Puratise will disinfect all vehicle interior surfaces.

Puratise continues to work for up to 6 months. Its light and completely dry formula is easy drawn into the air-con system.

Puratise will leave no moisture or wet residue and will not mark vehicle interiors.

## Instructions:

1. Start the vehicle engine.
2. Ensure all windows are shut.
3. Switch on air-conditioning.
4. The air-conditioning settings should be as follows:
  - a. Set the system to re-circulate.
  - b. Ensure the fan speed is on maximum.
  - c. Set the air to flow through all vents.
  - d. Adjust the temperature to 20 - 22° C (for climate control) or move temperature control to the halfway position.
5. Stand the PURATISE can in a central position within the vehicle, pointing upwards.
6. Press down the trigger until it locks.
7. Exit the vehicle, ensuring all doors are closed.
8. Allow 10 minutes for the can to fully circulate.
9. Switch off the engine and leave vapour in the vehicle to continue working (preferably overnight).
10. NB: if the vehicle is to be used immediately, run the air conditioning system for a further 5 minutes with the doors open.
11. For best results, repeat the treatment at regular intervals.
