

REFRIGERANT CHARGING MACHINE

Technical Specifications

Vacuum Pump: 3m³/hr (1,5 CFM)

Electronic Scale Resolution: ± 5gr

2x16 character LCD screen

Hose Length: 180 cm (250 cm - 300 cm)

Refrigerant Types: R134 ,R1234yf, R12,R22,R404 vs

Operating Temperature: 8°- 49°C

Dimensions: 45cm X 21cm X 49cm

Weight: 14 kg

Shipped with 180cm hoses and R134a connecting adapters.

Main Features

- ▶ Microprocessor Controlled.
- ▶ Easy-to-use control panel.
- ▶ Electronic scale: Possibility to monitor the amount of refrigerant in the tank, the amount of refrigerant charged and instant charging amounts.
- ▶ Automatic follow-up of programmed operations.
- ▶ Leak detection.
- ▶ New oil injection.
- ▶ High speed refrigerant charging.
- ▶ With the statistics menu, the user can see the amount of transactions refrigerant pressure, vacuum gauge.

Practical, portable, light.
